I agree that a registered nurse, occupational therapist, physical therapist, social worker and recreational activity coordinator will assess my patient. A registered dietician, speech therapist, podiatrist and psychological consultant may provide care if a need is identified by the multidisciplinary team. A plan of care will be developed, under which care will be provided for the next 6 months. The therapeutic goal is for my patient's level of function to be maintained or improved. I agree that my patient meets the criteria set by CA Code of Regulations Title 22 for attendance in an ADHC program. This requires that there is a medical condition requiring the treatment or rehabilitative services ordered by an MD; a mental or physical impairment which handicaps daily living but not requiring 24 hour institutional care; and a high potential of deterioration and probable institutionalization if ADHC care is not provided.
